Data protection

CONTOSO FICTIONAL DEMO - approved content for this scenario only.

Source-ID: KB-DATA | Version: v2 | APPROVED | Effective: 2026-10-01 | Scenario: 2026-10-13

Section 1

Current processing: management telemetry in US East; backup in US West; supplier support administrators in the US and UK. EU-only processing and EU-only administrator access are not currently supported. Bank approval and legal transfer assessment are required.

Section 2

Minimization: telemetry contains device identifiers, operator account identifiers and event timestamps; no payment payload is intended. Telemetry retention is 90 days; backups expire after 35 days. Mask identifiers before support-bundle sharing. Production bank data must not train AI.

Section 3

Only an unsigned DPA template exists. No signed Woodgrove DPA, transfer assessment, current subprocessor register, deletion certificate or twelve-hour breach commitment is in the evidence pack. Legal/privacy review is mandatory.
