# Supply and lifecycle

CONTOSO FICTIONAL DEMO - approved content for this scenario only.

Source-ID: KB-SUPPLY | Version: v2 | APPROVED | Effective: 2026-10-01 | Scenario: 2026-10-13

## Section 1

Lifecycle baseline: CAP-6E is a legacy requested SKU; verify its current Atlas status and CAP-7 substitution live. CMS-48X-POE is the engineering candidate for 10G instead of requested CMS-48P-POE. Bank must approve substitutions; original demand must remain visible.

## Section 2

No stock or incoming date is frozen in the KB. Read visible On hand, Reserved and Available, then Check availability in the unsaved New quote. Plans are not reservations or commitments. Never Save quote or create an order.

## Section 3

Delivery terms, transport charges, counterfeit/serial evidence and lifecycle dates require review when absent. Do not infer warranty or delivery guarantees from stock, API schema or a product name.
