Support and continuity

CONTOSO FICTIONAL DEMO - approved content for this scenario only.

Source-ID: KB-SUPPORT | Version: v2 | APPROVED | Effective: 2026-10-01 | Scenario: 2026-10-13

Section 1

CARE-NET-3Y-NBD covers three years only. Next business day is a service planning target after diagnosis, subject to cutoff, location and availability; not four-hour replacement. No approved year-four/year-five renewal price or future stock guarantee exists.

Section 2

Support: English service desk in the current SLA window; bank identifies a contact and distinguishes endpoint, identity, ISP and supplier hardware incidents. Local spares are optional and separately scoped.

Section 3

No measured RTO/RPO, continuity test or service-desk failover record exists in this pack. Exit includes configuration exports and asset list; transition effort needs an agreed scope and rate.
